NOTIFICATION LETTER TO RESIDENTS

RE: Patterson Urban Bicycle Trail Project at Salado Creek

Dear Resident(s)

The City of Patterson is excited to inform you that the City has been awarded funding through the Urban Greening Grant program, which is administered through the California Natural Resources Agency, for the Patterson Urban Bicycle Trail Project at Salado Creek. “The Urban Greening Program is part of California Climate Investments, a statewide program that puts billions of Cap-and-Trade dollars to work reducing GHG emissions, strengthening the economy, and improving public health and the environment— particularly in disadvantaged communities. The Cap-and-Trade program also creates a financial incentive for industries to invest in clean technologies and develop innovative ways to reduce pollution. California Climate Investments projects include affordable housing, renewable energy, public transportation, zero-emission vehicles, environmental restoration, more sustainable agriculture, recycling, and much more. At least 35 percent of these investments are located within and benefiting residents of disadvantaged communities, low-income communities, and low-income households across California. For more information, visit the California Climate Investments website at: www.caclimateinvestments.ca.gov.”

This project will fill in existing gaps to create a continuous bike and pedestrian path along Salado Creek and American Eagle Avenue, connecting 2 school and 3 public parks. An estimated 6,458 linear feet of continuous paved bike path and walking trail will be constructed. Approximately 273 low water usage/drought tolerant trees will be planted along with lighting throughout the path. Additionally, a protected undercrossing will be constructed at Sperry Avenue and American Eagle.

The City will be hosting a total of three community workshops via Zoom: Early Design Phase: October 14, 2020 @ 6 PM, Final Design Phase: November 18, 2020 @ 6 PM, and Early Construction Phase: March 24, 2021 @ 6 PM.

The purpose of the workshops is to:

- Explain the Project details and inform the Community Members and Stakeholders on what to expect
- Provide Project Timelines
- Discuss bicycle education campaign options and gather input from the Community
- Involve Community Members in the future of the path, generate a list of potential future bicycle parking locations, and sponsorship of benches
- Ignite interest, encourage participation, generate buy-in, discuss ideas and concerns, and identify new partnerships

We look forward to discussing this project and hearing any feedback you may have.

Respectfully,

Tiffany Rodriguez
