

## VOP Public Notice-Revised

The City of Patterson's Engineering and Public Works Department, hereby gives notice of the Villages of Patterson's intent to revise the flood hazards, generally located between Walnut and Eucalyptus Avenue. Specifically, this map request addresses currently mapped flood hazards in an area bounded by the Union Pacific Railroad (UPRR) tracks of the west, Eucalyptus Avenue on the north, Sycamore Avenue on the east, and Walnut Avenue on the south. As a result of the revision, the 1 percent annual chance floodplain shall be contained to main arterial streets that lead to a varied conveyance configuration. For consistency with the currently-effective mapping, the proposed revisions would maintain the Zone AO designation, but with substantial revision of the Zone AO boundaries to reflect the anticipated extent of flooding. This would include extension for the Zone AO designation easterly to Sycamore Avenue.

The public workshop has been rescheduled for **Tuesday, August 11, 2015 at 6:00pm** in the Council Chambers located at 1 Plaza, Patterson, CA 95363. Maps and detailed analysis of the revisions can be reviewed on the city's website at <http://www.ci.patterson.ca.us/204/Floodplain-Management> or in person prior to the workshop. Please send comments to: Maria Encinas, CFM, PO Box 667, Patterson, CA 95363.
